

The Raphex Index 2010–2013 is prepared by members of the Radiological and Medical Physics Society of New York (RAMPS, Inc.), the New York chapter of the American Association of Physicists in Medicine (AAPM).

Raphex is intended to help residents review their radiological physics course. Although one exam cannot cover every topic in the syllabus, a review of Raphex exams/answers from at least three consecutive years should cover most topics. Dashes following a year indicate no questions for that year.

Remember to let the Index guide you to the Exam Answers books for each year as well. The Exam Answers book provides a short explanation of why each answer is correct, along with worked calculations where appropriate. An in-depth review of the exam with the physics instructor is encouraged.

We hope that residents will find this index useful in reviewing their radiological physics course.
